Hi Lorayne: The Development Services Director, Bob Vacchi, has determined that the Planned Commercial Development Permit for the site was never utilized and the project can proceed with a ministerial permit. No discretionary permit will be required provided the project complies with all development regulations.

Hello Janay-

The City has not provided me/CPG Chair with the results of the Preliminary Review - have you been provided this information? I would be interested in reading the report.

My Vice Chair asked about BIM modeling?

Regards.

-Lorayne
