

Miramar Clearwell Improvements

Project Overview

This project is located at [10710 Scripps Lake Drive, San Diego, CA 92131](#). Built in 1959 and 1974 respectively, Clearwells #1 and #2 are nearing the end of their useful service lives. The clearwells provide storage of treated water prior to distribution in to the potable water supply system.

This project will:

- Demolish the existing clearwells, associated piping, and facilities;
- Construct two new clearwells, associated piping, and facilities increasing the combined storage capacity to approximately 58 million gallons;
- Construct a new Chlorine Contact Chamber with an adjoining lift station;
- Construct a new maintenance building;
- And install miscellaneous site improvements and a new guard shack

Anticipated Schedule

The estimated schedule for design, construction, and permitting for this project is approximately 6 years.

- **Construction Start:** Early 2016*
- **Construction Complete:** Early 2020*

*Dates are approximate and subject to change; please visit this web page regularly for the latest!

Project Budget

The project's planning, design and construction budget is \$85 million.
