

From: Wong Midori <midori.wong@sandi.net>

Dec 1 (1 day ago)

The preliminary estimate of student generation for the project is:

Grades K-5: 30-50 students
Grades 6-8: 15-25 students
Grades 9-12: 30-50 students

The project falls within the attendance boundaries of Dingeman ES, Marshall MS, and SRHS.

This potential new resident enrollment can be accommodated in existing school facilities by monitoring nonresident enrollment.

The attached charts show:

Page 1: The number of students who live within the attendance boundary of the school, and what school choices those students are making.

Page 2: 2015-16 enrollment of the school, broken down by where students live (i.e., resident within the attendance boundary, or nonresident).

As with all campuses, we will monitor and adjust enrollment targets based on potential and actual new development, growth projections and other factors like class size and capacity at the articulating and neighboring schools.

I will share this information at tonight's meeting as well.

Thanks,
Midori
